### UGC, NEPAL: A BRIEF INTRODUCTION

---

#### 1.1 Background

Established as an autonomous statutory body under the *University Grants Commission Act, 1993*, UGC has the following broadly envisioned objectives:

- to promote, facilitate, support, and enhance the quality of higher education,
- to enable educational institutions to meet the national need for an educated and trained workforce,
- to develop Nepali academia as per the global standard,
- to solve problems and face challenges that have been historically impairing the development and quality of higher education in the country, and
- to make higher education inclusive and accessible to disadvantaged and marginalized communities.

#### 1.2 Functions

UGC allocates and disburses grants to universities and higher education institutions to ensure their smooth operation and to help them realize academic excellence. UGC is also expected to define the academic standard of higher education and to facilitate good rapport and coordination among the universities in the country, thereby encouraging them to cooperate, collaborate, and exchange their academic experiences. In line with this spirit and expectation, the *UGC Act (1993)* mandates the University Grants Commission to carry out the following functions:

- Formulate policies for allocating government grants to universities and higher education institutions;
- Disburse grants to universities and colleges, and make recommendations to the government for revising the provision of grants;
- Award grants for research, scholarships, and fellowships;
- Take necessary measures to maintain the standards of higher education;
- Advise the government on matters concerning the establishment of new universities, or the operation of an institution of higher education with an affiliation to foreign universities/institutions;
- Make necessary arrangements for the exchange of resources, funds, and fellowships between universities and educational institutions within and outside Nepal.

### 1.3 Organizational Structure

The apex body of UGC (the Board) consists of eleven members headed by the Executive Chairman. Office bearers are either nominated by the government or invited to act as *ex-officio* members. Upon the recommendation of the Ministry of Education, the Council of Ministers nominates the Executive Chairman and the Executive Member Secretary of the commission from academic leaders and eminent professors. The secretaries of the Ministry of Education and Ministry of Finance, and a member of National Planning Commission (Social Sector/Education Desk) are the *ex-officio* members. Among the two Vice-Chancellors represented, one is usually from Tribhuvan University and the other from a different university within Nepal. Two distinguished professors and two prominent educationists are nominated to be members of the apex body. The tenure of the members, including the Chairman and the Member-Secretary, is four years from the date of appointment; however, they are eligible to be reappointed.

In order to carry out its duties and responsibilities, UGC had initially set up four divisions: the Administration, Finance, Planning, and Monitoring divisions. With the commencement of the Second Higher Education Project in 2007, Quality Assurance and Accreditation Division, Research Division, HEMIS Section, and Reform Unit have been added to UGC. These divisions and units are headed by officers with expertise and experience in the given areas. The Administration Division is led by a Joint-Secretary Level officer, the Finance Division by an Under-Secretary level finance controller, the Research and Quality Assurance and Accreditation Division by a professor. In addition, UGC occasionally forms different committees and tasks-force units to undertake and fulfill various responsibilities. The University Grants Commission Act specifies provisions for forming different committees and recruiting necessary staff members, hiring service providers, or receiving services of consultants and experts. UGC has the following committees:

- University Coordination Committee
- Higher Education Reforms Project Steering Committee
- Quality Assurance and Accreditation Committee
- Research Evaluation Committee
- Quality Assurance and Accreditation Technical Committee
- Academic Committee

In addition to these committees, several other teams, tasks force units, and special task committees, namely the Reform Committee, Cluster Committee, Peer Review Team, Theme/Task Committee, and University Feasibility Study Task Force have also been formed. To create a systematic archive of its activities and achievements, UGC has also formed a publication board which has published historically important documents, research articles, articles on current affairs, and annual reports.

**List of Board Members (2017/18)**

SN	Name	Designation
1.	Prof. Dr. Parashar Prasad Koirala	Chairman
2.	Prof. Dr. Dev Raj Adhikari	Member-Secretary
3.	Member, National Planning Commission	Member (Ex-Officio)
4.	Secretary, Ministry of Finance	Member (Ex-Officio)
5.	Secretary, Ministry of Education	Member (Ex-Officio)
6.	Prof. Dr. Tirtha Raj Khaniya Vice Chancellor, Tribhuvan University	Member
7.	Prof. Dr. Ishowri Prasad Dhakal Vice Chancellor, Agriculture and Forestry University	Member
8.	Prof. Dr. Govinda Prasad Acharya Baneshwor, Kathmandu	Member
9.	Prof. Dr. Pramod Kumar Jha Post-Graduate Campus, Biratnagar	Member
10.	Dr. Chandra Kala Ghimire Tribhuvan University, Kirtipur	Member
11.	Dr. Bikas Adhikari Kathmandu University, Dhulikhel	Member

**1.4 Duties and Responsibilities**

UGC plays an instrumental role in the establishment of new universities formulation of national academic policy, allocation of budget and distribution of grants, setting up criteria, norms and standards of higher education, and providing funds for research and academic activities.

**1.4.1 Role in Establishing a New University**

UGC provides expert advice to the Ministry of Education (MoE) when establishing a new university. With the formation of task committees, it carries out various tasks, including feasibility studies, the assessment of infrastructure and prerequisites, and the preparation of a draft act for the proposed university.

**1.4.2 Advising on Education Policies**

UGC advises the government on higher education policies upon the request of MoE by creating a policy-drafting committee. Such advisory tasks include bringing about appropriate higher education policies and reviewing and revising existing policies so as to address national needs.

### **1.4.3 Budget Allocation and Grants Distribution**

UGC also advises the government on the allocation of the national budget for the education sector by creating a task committee responsible for formulating a suitable framework for the allocation of funds. Once the budget for the higher education sector is allocated, UGC undertakes the task of systematically disbursing the funds.

### **1.4.4 Assurance of Standards and Quality of Higher Education**

Through its Quality Assurance and Accreditation (QAA) process, UGC sets up criteria, norms, and standards of higher education in the country.

### **1.4.5 Grants Assistance**

In order to establish and promote research culture in higher education institutions, UGC provides grants assistance to qualified individuals and institutions to carry out research activities.

### **1.4.6 Publication and Creation of Archives**

Through its periodic and regular publications, including *Abstracts of Mini Research Projects*, *Journal of University Grants Commission*, *UGC Newsletter*, *Annual Report of UGC Grants Commission*, and *Higher Education Information System (HEMIS) Report*, UGC not only disseminates research reports but also maintains records of valuable information and data related to higher education in the country.

### **1.4.7 Implementation of Higher Education Reform Project (HERP)**

The Government of Nepal, with the support of International Development Agency (IDA) and the World Bank, has been implementing Higher Education Reform Project (HERP, 2015-2020). Since its commencement on 22 May 2015 (Jestha 8, 2072 BS), the project has been implemented on the basis of result-based progress monitoring and fund flow. To oversee the implementation of the project, Seven Disbursement Linked Indicators (DLIs) are agreed upon. As per the financing agreement, the fund flow from the WB to the Government of Nepal is linked to the progress based on the DLIs. The total cost of the DLIs achieved for the base year is SDR 5.95 million, which is approximately US\$ 8.625 million.

## SECTION II

### BUDGET AND FINANCES

---

#### 2.1 An Overview of Financing to Universities and HEIs

One of the major responsibilities of UGC is to formulate policies for allocating grants to different higher educational institutions. On the basis of set policies and criteria, the Commission provides grants to institutions and, when necessary, coordinates with concerned bodies to provide additional funding to universities. The Government of Nepal (GoN) provides a higher education budget to the UGC under the budget Head No 350019 classified as capital and operating grants with and without terms. Based on the requirements of the sector, the government also provides additional grants. Similarly, GON provides grants to implement Higher Education Reform Project financed by World Bank as a soft loan. UGC funds to universities are made available in the form of block grants, which are of two types: operational and developmental.

The operating funds for TU and NSU are estimated on the basis of salaries and basic logistical support provided to the teachers and other staff members. The autonomous TU constituent campuses have been receiving earmarked grants from UGC based on the number of faculty and administrative positions on campus irrespective of whether they are vacant or filled. In the case of other universities (KU, PU and POKU), funds are provided using an agreed upon formulae based on the principle that undergraduate programs are designed to recover the cost of operation. However, a total of twenty percent of the enrolled students must have the opportunity to receive a scholarship based on their financial status. Master's level programs are to be designed so as to recover 80 percent of the associated cost with a total of twenty percent of the enrolled students receiving need-based scholarships. The formulae consists of core funding for maintaining the university system; UGC finances the not-recovered cost equal to 20 percent for the master's programs and covers the income lost by the university while providing scholarships to 20 percent of enrolled students. LBU has received operating grant equal to the core funding. In a similar fashion, Agriculture and Forestry University, Far Western University, Midwestern University and Nepal Open University are getting funds sufficient to cover the cost of salaries, benefits, as well as other operating costs. Likewise, Medical College Promotion Board has been receiving operating grants sufficient to carry out its activities.

In cases of the community campuses, grants based on predetermined criteria (formulae) have been provided. The formulae consists of minimum grants (currently 300 thousand per campus) plus additional grant on the basis of number of students enrolled, number of the programs being run, geographical location of the campus, availability of constituent campuses, programs offered on S&T subjects and so forth. Development funds are provided on the basis of needs as well as the availability of government funds. Basically, the developmental grants focus on the creation of new infrastructure and maintenance of existing ones.

## 2.2 UGC Regular Program & Budget

University Grants Commission (UGC) had passed an annual budget of Rs. 9,91,78,15,000 for the fiscal year 2017/18. The Commission had approved the regular and development budgets for the universities, community campuses, other higher education institutions, quality improvement programs and other programs of the UGC. The details of UGC programs & budget for the fiscal year 2017/18 are presented below.

The Government of Nepal provides the regular grants to the UGC in 2017/18:

### 2.3 Income and Expenditure of UGC in 2017/2018

In the fiscal year 2017/2018 (FY 2074/075), UGC received grant assistance of Rs. 8,298,771 thousand as operating grants and 1823000 thousand as capital grants, out of grants allocated originally in the Red Book and additional grants provided by Government. In addition to this, Nrs 32,50,00 thousand had been released by the government to reconstruct the HEIs damaged by the earthquake.

UGC did not request GON to release grant because it has sufficient balance amount there on to implement HERP subject to reimbursement from IDA. UGC has earned Rs 82035 thousand of income from various miscellaneous sources.

### 2.4 Grants Disbursed to Higher Educational Institutions

During the last fiscal year, the UGC disbursed a total of Rs. 9,312,956 thousand to nine universities, two development committees, and affiliated community based campuses and other higher educational institutions across the country. The largest amount was granted to Tribhuvan University totaling Rs. 6,730,456 thousand and the smallest amount of Rs. 50,000 thousand was provided to the Rajeshree Janak University. The grant assistance is divided into the recurrent and development categories. The list given below specifies the details of the grant assistance to different universities and institutions:

**A. Grants to Universities**

**Recurrent grants of TU includes retirement benefits of Indian Teachers of Nrs. 3,956 thousands**

**B. Grant to Community Based Campuses**

The Commission provided grants amounting to Rs 516,506,025 to community campuses across the country under different categories in the last fiscal year. The Commission disbursed grants totaling Rs. 320, 491,025 as regular grants to community campuses and additional Rs. 196,015,000 for the physical facility development of the campuses. The community campuses were selected for regular grants and physical facility development grants on the basis of documented evidence through their proposals, number of students and academic programs, and the location of the campus (for example: backward areas, remote areas, or hilly regions). Under the physical facility development category of grants, campuses were given funds for the construction of buildings, and purchasing books, furniture, or other equipment.

**C. Grants for Reconstruction**

University Grants Commission made the disbursement of Rs. 3250,000,000.00 to Tribhuvan University for the reconstruction of physical infrastructures damaged after the earthquake in 2015. Likewise, the Commission also disbursed Rs. 20000000 to Waling Campus, Syangja for reconstruction.

**D. Quality Improvement Program (QIP)**

The Commission disbursed grants amounting Rs. 30,509,396.28 for Quality Improvement Programs in the previous fiscal year. Under QIPs, the Commission provided grants for fellowships, research projects, refresher courses and different types of capacity development programs for higher education institutions, and their teachers and students.

## SECTION III

### REGULAR PROGRAMS OF UGC

---

#### 3.1 An Overview

The regular programs of University Grants Commission are divided into two sections: (1) Institutional Development Grants and (2) Quality Improvement Programs. The first category consists of five sub-components: i) Grants for Universities, ii) Regular Grants, iii) Physical Facility Development, iv) Special Grants, and v) Performance and Formula Based Grants. The second category consists of eight sub-components: i) Fellowship, ii) Thesis Preparation Grants, iii) Scholarship, iv) Research Promotion, v) Capacity Development Program, vi) Teaching/Study Visit, vii) Research Infrastructure Development Support Seminar/Workshop/Conference, and viii) Quality Assurance and Accreditation.

#### 3.2 Institutional Development Grants

Institutional development grants consist of four major categories. The fourth category has additional sub-categories.

##### 3.2.1 Grants for Universities

UGC provides grant assistance to universities not only so they are able to develop and operate, but also in the hope that they can transform the country through academic discovery. As per the national need, grant assistance is also provided to newly established academic institutions and universities. Grants are provided on different forms: bulk grant, formula-based grant, or program grant. Universities must apply to obtain grants, listing the details of their programs alongside a budget estimate after which the UGC consults relevant stakeholders and provides grants as per the set criteria.

##### 3.2.2 Regular Grants

Under this type of grant assistance, affiliated community campuses are provided with regular grants to enhance the quality of education. The grant assistance is provided according to the rules and regulations charted out in the manual drafted in 2013. Regular grants are provided to the colleges that have completed at least one academic year with the Bachelor's or Master's level programs. The community campuses demanding regular grants are selected on the basis of documented evidence of number of students, academic programs, and the location of the campus (for example, backward areas, remote areas, or hilly regions). Applications or evidence received after a set deadline or those that do not follow proper standards are not accepted.

*List of Community Campuses that received regular grants in 2017/18 is presented in Annex A.*

### **3.2.3 Physical Facility Development**

The grants under this program are provided to extend the physical facilities such as classrooms and library rooms in community campuses, where they run Bachelor's or Master's programs.

*List of Community Campuses that received physical facility development in 2017/18 is presented in Annex A.*

### **3.2.4 Library Strengthening and Equipment Grants**

In order to enhance the quality, capability, and infrastructure of community campuses, a number of grants are provided under various headings. The major headings for this type of funding include grants for purchasing books, furniture, computers, physical infrastructure, and teaching materials.

#### **3.2.4.1 Grants for Purchasing Books**

Under this program, the UGC provides grants to community campuses to purchase books to enrich their libraries.

*List of Community Campuses that received grants for purchasing the books in 2017/18 is presented in Annex A.*

#### **3.2.4.2 Grants for Purchasing Furniture**

Under this program, grants can be provided to community campuses to purchase furniture for their libraries.

*List of Community Campuses that received grants for purchasing the furniture in 2017/18 is presented in Annex A.*

#### **3.2.4.3 Grant Assistance for Purchasing Equipments**

UGC also provides grants to community campuses to purchase computers and other ICT equipments to help them efficiently execute their administrative and academic activities through a systematic use of information technology.

*List of Community Campuses that received grants for purchasing the equipment in 2017/18 is presented in Annex A.*

### **3.2.5 Special Grants**

Special grants are provided to community campuses which have completed two academic years of teaching but have not received any regular grants from the Commission. This type of support is mainly focused for purchasing books, furniture and equipment to accelerate academic and administrative work on campus.

## **3.3 Quality Improvement Programs**

The University Grants Commission is not only devoted to expanding higher education in the country but also committed to the continuous improvement of its standard and quality. This approach serves a dual objective: meeting the national need for education and competing in international

markets. In this regard, UGC has been implementing Quality Improvement Program (QIP), which has the responsibility of modifying and improving the existing curricula of higher education, conducting refresher courses, and launching skills-and-capacity-building programs for teachers. In addition, QIP promotes the culture of research, and improves academic, educational, and physical capabilities of higher education institutions. Quality improvement programs are organized as per the *Regular Program Guidelines 2074* and necessary endeavors for improvements have been made based on the results of previous programs and suggestions from the stakeholders.

### 3.3.1 Fellowship Programs

As an integral part of research funding component of the regular program of the UGC, this subcomponent covers the financial support to the faculty members from HEIs and fresh postgraduate students taking Master's, MPhil or PhD degrees. This program is also introducing the provision of postdoctoral fellowship in large UGC funded research projects. The primary purpose of this program is to support quality research in areas of national priority and academic excellence leading to theses required for postgraduate degrees. Young students as well as faculty members of HEIs of Nepal are beneficiaries of this program.

This program comprises PhD fellowships for student up to three years, financial support for PhD research provided through the host institution, MPhil fellowships for up to 18 months, and partial support for research or thesis preparation for Master's, MPhil and PhD students. A limited number of postdoctoral fellowships for up to 2 years are provided to qualified researchers to work in UGC-funded research projects. Candidates from disadvantaged groups (Women, Dalit, Janajati, Madhesi, persons with disabilities, and persons from or working in remote districts) receive extra marks during evaluation of applications. Under special eligibility conditions, upper age limit for candidates from the underprivileged group can be relaxed by 2 years.

#### 3.3.1.1 PhD Study Fellowship

The primary purpose of this program is to support qualified junior faculty and young students pursuing PhD degrees in universities in Nepal or nationally recognized universities in any SAARC country. Every year, the UGC provides about 50 PhD fellowships. Of them, 50% are allocated to technical clusters and the rest to the non-technical clusters. From that, 75% of allocated seats go to faculty candidates and the rest go to the young student candidates. During the HERP period, 10 PhD fellowships are provided to the faculty of autonomous or accredited HEIs. Selection of candidates for PhD fellowships is based on a competitive evaluation of PhD research proposals and academic and research credentials of the candidates. Research proposals are evaluated based on the indicators of academic merit and association of the research project to national priority areas. Candidates from underprivileged groups receive additional marks during the evaluation of applications.

The award consists of a monthly allowance, limited assistance to cover laboratory expenses and field visits, and reimbursements for the book purchases, travel grants and research publication costs. The allowance is offered for a period of 3 years and the rest is made available during the entire program.

### PhD Fellowship

	Financial Support	Amount (Rs.)	Disbursement
A	Monthly allowance 7000 × 36 months	2,52,000	Six installments
B	Study material cost	20,000	Reimbursement
C	Field study visit	30,000	Two installments upon the recommendation of the supervisor
D	Laboratory expense	40,000	Upon submission of the plan for the expenditure recommended by the supervisor
E	Printing cost	15,000	After submission of a copy of the final draft of the thesis to the UGC
F	Travel grant (conference)	Up to 45,000	Reimbursement
G	Article publication fee	Up to 50,000	Reimbursement

Scholars receiving fellowships and support for research are required to report every six months and present a progress report at the end of each year. Progress reports, publications in research journals, paper presentations in seminar/workshops, etc. are the major output indicators used to evaluate the performance of each fellow researcher. Support may be discontinued to a fellow who is unable to make satisfactory progress. A prior notice and at least one chance for improvement are given to such research fellows.

*The list of research scholars awarded under PhD Fellowship in 2017/18 is presented in Annex B.*

#### 3.3.1.2 M. Phil. Study Fellowship

The primary purpose of this program is to support qualified faculty members and young students of Nepal's HEIs who are seeking MPhil degrees to enhance their capacity. Every year, 40 fellows are supported for their MPhil degree in any Nepalese HEI. 50% of the fellowships are reserved for faculty members. The rest are awarded to young students. The selection of candidates is based on the evaluation of candidate's academic and publication records, their underprivileged status, and an interview conducted by a relevant Cluster Committee.

*The list of M. Phil. Fellowship winners in 2017/18 is presented in Annex C.*

#### 3.3.1.3 Postdoctoral Fellowship

Recognizing that postdoctoral fellowship is a strong supporting system for promoting research culture in universities and that the universities in Nepal are yet to introduce it, a limited number of postdoctoral fellowships are introduced. Initially, the postdoctoral position and fellowship are provided for technical and laboratory-based research among the projects funded by the UGC Collaborative research grant. Research projects in the HEIs funded by sources other than the UGC can also be considered for support. The Alternative scheme of Appointment and Promotion based on Academic Excellence introduced by Tribhuvan University under HERP will also be encouraged to link with this postdoctoral fellowship program. The UGC postdoctoral fellowship is for up to two years.

### 3.3.2 Thesis Preparation Grants

#### 3.3.2.1 Partial Support for PhD Fellow

The purpose of this program is to provide partial support to PhD Fellows who have not received a fellowship or financial support from any other source. The support under this program is as shown in the following table.

SN	Support	Amount (Rs.)	Disbursement
1	Field study	15,000	Upon submission of a plan, together with a recommendation by supervisor (request should be made within 3 years from the date of acceptance of PhD research proposal)
2	Study material	15,000	Reimbursed if requested within 2.5 years from the date of acceptance of PhD research proposal
3	Printing	15,000	After submission of a copy of the final draft of the thesis

A PhD fellow without fellowship and financial support from any other source can apply for this support within the specified time during the course of his/her PhD program. Applications can be submitted to UGC any time throughout the year. Applications should accompany a copy of the PhD Thesis proposal/progress report and a recommendation letter from the institution or supervisor, certifying that the candidate has not received any other financial support. Every year, 20 students are supported under this program.

*The list of PhD scholars awarded under partial support in 2017/18 is presented in Annex D.*

#### 3.3.2.2 Master's/M. Phil. Thesis Preparation Support

The purpose of this program is to support Master's and MPhil students who have not received any fellowships or research grants to prepare theses required for their degrees. All Nepali students enrolled in Nepali universities in MPhil/Master's programs are eligible to apply for support under this program. The fund received under this program can be used to cover costs required to complete research and prepare theses. Every year, 40 MPhil students and 100 Master's students are awarded under this program.

The amount of support for thesis preparation is as follows:

SN	Thesis for Degree	Support Amount (Rs.)
1	Master's/M. Phil. (technical cluster)	40,000
2	Master's/M. Phil. (non-technical cluster)	30,000

### **Eligibility and Requirement**

Final year Master's students with at least 70% marks or equivalent CGPA in technical clusters and 60% marks or equivalent CGPA in non-technical clusters, 60% or 3.00 CGPA in to-date final examinations, and MPhil students without any fellowship and research support are eligible to apply. Applicants are required to submit research proposal together with application during the application season.

*The list of the winners of grants for M. Phil. thesis preparation and Master's thesis preparation in 2017/18 is presented in Annex E.*

#### **3.3.2.3 Thesis Preparation Support for Persons with Disabilities**

Under this program, students with disabilities pursuing a Master's degree in any Nepalese university are provided with grant support for the preparation of their thesis through open competition. The grant amount is reflective of the degree of severity of disability; Rs. 25000 will be provided to the students with category-A and category-B disabilities whereas those with category-C disabilities will be provided with Rs. 20000.

Half of the amount is granted after the contract is signed, and the remaining amount is provided after the submission of a copy of the Master's Degree transcript and soft and hard copies of the thesis. Candidates who have already completed and submitted their research thesis to their institutions shall receive the full amount according to the category of their disability. Such candidates can claim this grant within six months of the thesis defense.

*The list of the winners of this financial support in 2017/18 is presented in Annex F.*

### **3.3.3 Research Promotion**

The promotion of the culture of research among individuals and institutions is one of the major objectives of UGC. This statutory body firmly believes that research not only enhances the academic knowledge of an individual but also of the concerned institution. To this effect, UGC has made a provision for research support programs since its inception.

#### **3.3.3.1 Small Research Development and Innovation Grants**

This grant is for supporting innovation projects focused on new technology, product or service of commercial value or application for solving existing problems. Preliminary results or prototypes of the product developed by the applicant are the primary criteria for the evaluation of the proposals. Either the basic research leading or contributing to development and innovation (Research project) or direct development and innovation projects (Development and Innovation project) are equally considered for when granting funding. Funding for each project under this grant is Rs. 1,40,000. Approximately 200 research projects are funded during the HERP period. The RDI project must be in the area of national priority.

*The list of individuals who were awarded with the small research development and innovation grants in 2017/18 is presented in Annex G.*

### 3.3.3.2 Faculty Research Grants

Throughout the project period, approximately 200 faculty research projects are supported by the project. This research funding is primarily targeted to faculty members supervising or capable of supervising postgraduate students. This program is intended to fund postgraduate research and produce research publications in quality journals. The project duration is 2 years. The funding limit for the faculty research is up to Rs. 3,00,000 for research in technical areas or for laboratory based research and Rs. 2,00,000 for research in non-technical areas or for theoretical research. Technical and laboratory-based research project can get additional grant of Rs. 1,00,000 if required to procure technical equipment, consumables and supplies.

*The list of individuals who were awarded with the faculty research grants in 2017/18 is presented in Annex H.*

### 3.3.3.3 Collaborative Research Grants

Funding is offered to collaborative research projects involving more than two faculty members of an institution or collaborating institutions. Such supporting grants are provided for relatively significant research areas, identified as areas of national priorities.

Research proposals involving more than two faculty members (a principal investigator and two or more co-investigators from the same or different higher education/research institutions and disciplines) are solicited from faculty members for funding through a competitive selection process once a year. The principal investigator must have been a permanent faculty member for the past five years and have demonstrated a good track record embellished by research accomplishments (at least two original research articles published in indexed journals). The co-investigators must be full time faculty members or have been a research fellow for one full year, and must demonstrate a similar track record with relevant research accomplishments. The involvement of two postgraduate students for PhD degrees or three or more students for MPhil/Master's degree is required. The principle investigator and co-investigators are collectively responsible for all academic and financial obligations. The project must have support from the host institutions.

Approximately 35 such research projects are funded under this grant. The funding limit for Collaborative research grants is NRs. 20,00,000 for technical or laboratory based research projects and Rs. 15,00,000 for non-technical and theoretical research projects. The fund can be spent only on the approved activities of the approved research project. All the equipment, technologies and resources procured by this fund are the property of the host department(s). The host institution will receive 10% of the grant as Assistance to Department for covering overhead cost. In cases where more than one host institution is involved, the assistance fund is divided equally among the institutions. A limited number of research projects in technical clusters may apply for a postdoctoral position to be funded by the UGC.

In order to encourage the culture of collaboration in general and also as a tool for motivating relatively disadvantaged community campuses to get into research programs, a provision is included in the evaluation scheme to give additional mark for any collaboration with faculty members from community campuses.

Selection of application for Collaborative Research Grant award is based on academic credentials of the principal investigator, involvement of graduate students and investigators from underprivileged groups and the quality of the proposal.

*The list of the research projects awarded under the collaborative research grants in 2017/18 is presented in Annex I.*

### 3.3.3.4 Matching Grants for Research Development and Innovation

In order to encourage collaboration between academia and industry, UGC has allocated Rs. 80,00,000 for creating an initial basket of UGC matching research co-fund innovative research. Eligibility criteria, application procedures, evaluations, and award amount for this grant are the same as that of the Collaborative Research Grant, Faculty Research Grant or Small RDI grant, depending on which is closer in terms of the fund pledged by the sponsor. The maximum limit for a matching research grant is Rs. 20,00,000. Applications can be submitted throughout the academic year. A proof of sponsorship or a pledge thereof should be presented together with the application to the UGC. More funds are transferred to the basket of the matching research funds from lower priority programs when necessary.

Eligibility and Procedure for Application, Evaluation and Award are decided by the matching grants pledged as shown in following table:

#### Procedure for Matching Research Grant

SN	Fund Pledged by the Sponsor (Rs.) [UGC will contribute the same amount]	Procedure
1	75,000 - 1,49,000	Follow the procedure for Small RDI grant
2	1,50,000 - 3,99,000	Follow the procedure for Faculty Research grant
3	4,00,000 - 20,00,000	Follow the procedure for Collaborative Research grant

### 3.3.3.5 Special Research

The purpose of this program is to support need-based research. Scientific research on nationally important and urgent issues or policy and program research urgent or relevant to the UGC, universities or governmental agencies are supported under this program. Generally, the UGC will solicit research

proposals on relevant issues from qualified individuals and institutions. The UGC might also consider investigator-generated research proposals. The list of the special research grants provided in 2017/18.

SN	Theme	Institution
1	Academic Performance in Higher Education : A Study on the Factors and Issues of Students Performances in Examinations	Research Center for Educational Innovation and Development, TU
2	Scope and Opportunities of Science and Technology Education in Nepal: A Study on the Possibilities and Challenges of Expanding the Access	Institute of Science and Technology, TU

### 3.3.3.6 Extramural Research Collaboration

Research collaboration between a principal investigator (PI) from the HEI in Nepal and extramural co-investigators (Co-Is) from national or international research institutions are encouraged under all research support programs. The minimum academic qualification required for extramural Co-Is is that of the PI in a Collaborative Research project.

### 3.3.3.7 Support for Publication of Research Article

Under this program, UGC will provide limited financial assistance to the recipients of UGC research funds and fellowships to pay for the publication fees of their research work in high impact indexed journals, on the basis of their need. This support can also be provided to research funded by agencies other than the UGC, depending upon the availability of funds. The limit of funding per eligible research article is Rs. 50,000.

### 3.3.4 Refresher Course/Capacity Development Program/Research Methodology Training

To enhance the capability of teachers and staff members of universities and constituent campuses, several programs such as Refresher Course, Capacity Development Trainings, and Research Methodology Training are conducted.

The objective of “refresher training programs” is to make university teachers aware about the recent changes in the course contents and teaching methods and to identify the best approach in the classroom. Such programs also help the teachers to enhance their academic capability by making them familiar with the latest teaching trends.

Different authorities such as universities, subject committees, dean’s offices, departments, campuses, or other higher education institutions can conduct refresher training programs with grant assistance from UGC. The program-hosting institution or authority can submit a grant proposal to UGC along with an outline of the programs. If the proposal meets the set standards of UGC, it provides a specified grant amount

*The lists of the higher education institutions that received grants for conducting Refresher Course/Capacity Development Program and Research Methodology Training is presented in Annex J.*

### 3.3.5 Teaching/Study Visit

Under this grant support program, the following activities are funded by the UGC:

#### 3.3.5.1 Visit by Professors in Higher Education Institutions

Under this program, senior professors and subject teachers are provided with grants for short-term teaching visits to constituent and/or affiliated campuses of universities in order to improve their teaching

#### 3.3.5.2 Visit to Institutions of SAARC Countries for Special Study/Research

Under this program, financial support is offered to teachers of universities or affiliated campuses to participate in short-term special studies or research programs within SAARC countries.

#### 3.3.5.3 Travel Grants to Participate in Foreign Seminars and Conferences

Under this program, partial financial support is offered to teachers invited by international institutions to participate in conferences, workshops, or seminars to present their papers or posters. The proposals should be submitted in the specified format.

The mode of support is as follows:

SN	Country	Maximum Amount (Rs. )
1.	Bhutan, Bangladesh, and India	15,000
2.	Pakistan, Sri Lanka, Maldives, Thailand, Burma, Malaysia, and Cambodia	25,000
3.	Country except 1 and 2	30,000

*The details of travel grants provided to teachers in the last fiscal year are presented in Annex K.*

### 3.3.6 Grants Assistance for Workshops, Seminars, and/or Conferences

Under this program, partial financial support is provided to academic societies of universities, campuses, departments, and related agencies to host a seminar, workshop, and or conference to study and analyze contemporary issues or problems in a specific area. The societies should organize such events jointly with the campus or concerned department.

The following table specifies the range of support that can be provided to such events:

SN	Program	Support Amount up to (Rs. )
1.	Local level program	50,000
2.	National level program	75,000
3.	International level program	1,50,000

*The list of the higher education institutions that received grants for conducting a seminar, workshop, or conference is presented in Annex L.*

### **3.3.7 Research Infrastructure Development Support**

Under this subcomponent of research funding, limited funds are provided for different activities related to institutional support for research infrastructure.

The selection of institutions is done on the basis of the evaluation of strategic plans submitted by the respective higher education institutions qualifying for funding. The process of selection is a competitive one and is facilitated similarly to other cases of research funding of UGC under HERP.

#### **3.3.7.1 Strengthening the HEI Libraries**

The purpose of this component of research funding is to strengthen the capacity of central libraries in terms of the library resources and researcher's access to them. Support is provided to increase the subscription capacity of libraries, digitize research literature and develop inter-library and library-to-user networking. UGC will develop a separate guideline for this purpose and central libraries will be invited to submit their proposals.

### **3.4 Research Laboratory Support**

The purpose of this program is to strengthen research laboratories in HEIs. Under this program, funds are allocated for establishing and strengthening research laboratories, purchasing laboratory equipment and service contracts and extensions and strengthening the physical infrastructures of research laboratories. UGC will determine the nature and scope of support and will invite applications from HEIs.

### **3.5 Research Management Cell (RMC)**

The purpose of this support is to help establish a research management cell, a research infrastructure consisting of management and regulatory structures essential for administering research programs in HEI. The research management cells will provide necessary infrastructural and functional support to the respective institutions for better coordination in ongoing research and development activities.

UGC provides funding in the range of Rs. 2,00,000 - 10,00,000 to qualified institution selected on a competitive basis. This funding should be used as an additional source to leverage the functioning of existing research management and infrastructure. The selected institutions may use the provided funds to procure computers and equipment, upgrade information communication technologies (ICT), purchase essential research literature, and form a Research Committee, Review Committee, Ethics Committee, or Hazard and Safety Committee with well-trained personnel and other related items. The fund will not be used to support recurrent expenses including meeting allowances.

Interested higher education institutions are invited to submit *Strategic Plans*, and after the competitive evaluation and selection of institutions, funds are made available. Disbursement of the funds is made in three installments on progress output basis. An agreement is signed between UGC and the concerned institution before commencing the disbursement of the funds.

Existing research management cells may also apply for funding to strengthening and restructuring . The funding limit for existing cells is Rs. 2,00,000. About 50% of the funding quota is reserved for higher education institutions located outside Kathmandu Valley.

*The list of higher education institutions that received financial support to establish research management cell in 2017/18 is presented in Annex M.*

### **3.6 Support for Research Publication**

Under this program, the UGC supports publication of high quality refereed (peer-reviewed) journals in Nepal as well as publication of research articles in high-impact, factor indexed journals.

#### **3.6.1 Support for Publication of Referred Journal**

Under this program, Research Division and Evaluation Committee will first form a taskforce to draft a minimum standard and criteria for classification of national refereed journals in Nepal. UGC will then draft eligibility criteria and procedure for funding to national refereed journals on the basis of merit and need of the journal. The funding is primarily for enhancing the institutional and academic quality of national refereed journals. The funding limit per eligible journal would be Rs. 5,00,000. The funding should be used for upgrading the quality of the journal as per the UGC procedures that are to be developed.

#### **3.6.2 Support for Publication of Research Articles in Indexed Journals**

Under this program, UGC will provide limited financial assistance to the recipients of the UGC research funds and fellowships to pay for the publication fee for their research in high impact, indexed journals on the basis of their need. This support can also be provided to the research funded by agencies other than UGC upon availability. The limit of funding per eligible research article is Rs. 50,000.

### **3.7 Quality Assurance and Accreditation (QAA)**

Participation in QAA is a voluntary process. Currently, UGC is running only institutional accreditation. Any higher education institutions which qualify as per predetermined criteria are eligible and can participate in the QAA process.

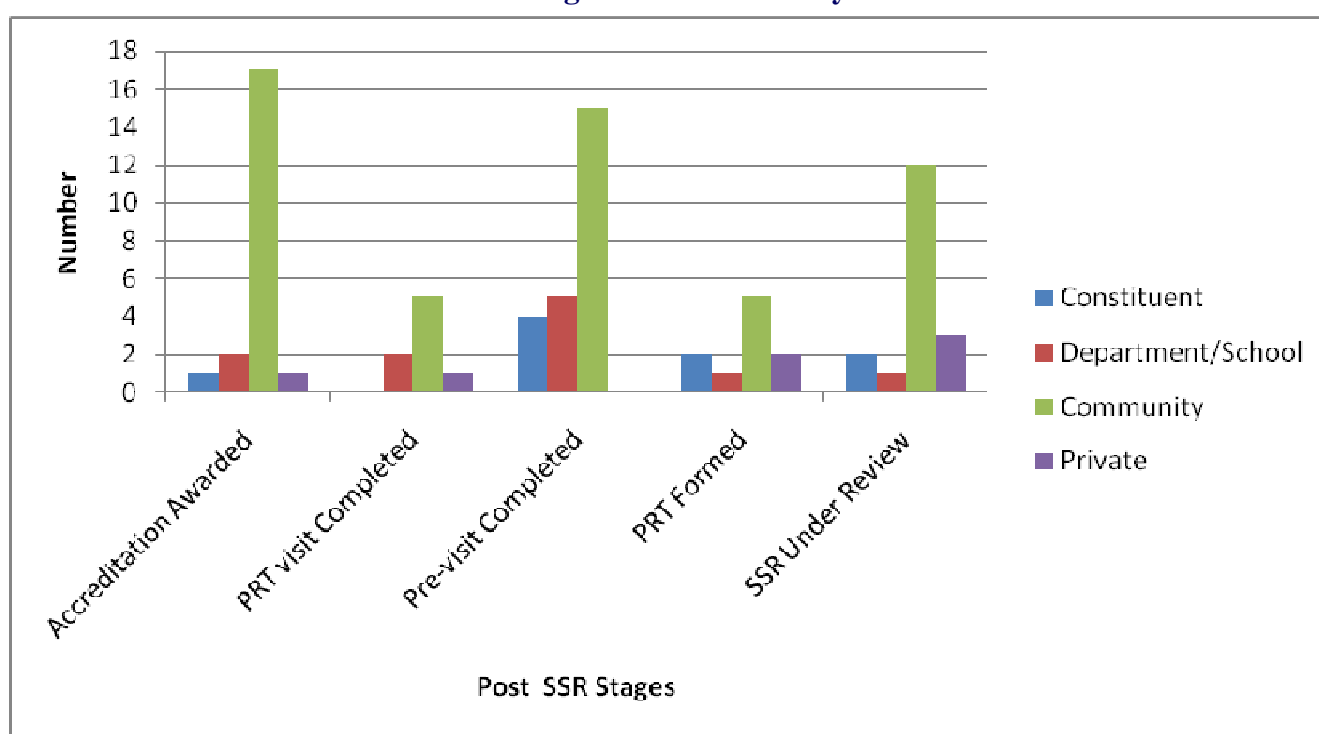

## SECTION IV

### QUALITY ASSURANCE AND ACCREDITATION (QAA)

A number of activities have been carried out throughout the year to accelerate the Quality Assurance and Accreditation (QAA) process. Since the primary objective of the QAAC is to assess and accredit HEIs of the nation, QAA has focused mostly on assessment and accreditation activities such as: building the capacity of institutions through orientation and facilitation, orientations for peer reviewers, conduction of technical committee and QAAC meetings, arrangement of several pre-assessment and PRT assessment visits, and award ceremonies. Gradually, the QAA system is gaining momentum by increasing the involvement of campuses in this process. Out of a total of the 1407 campuses (*EMIS Report, 2015/16, UGC*) of Nepal, 308 have participated in the QAA system by submitting a Letter of Intent (LoI) in QAAD. Among the participating campuses, 82 are in post SSR stage (stages up to accreditation after submission of Self Study Report).

Naturally, community campuses are significantly dominant in succeeding accreditation. Among 17 community campuses, 2 schools (KU), one constituent and one private campus have been accredited. Five community campuses, two departments (TU) and one private campus have completed the QAA cycle. Likewise, 15 community campuses, 5 departments/schools and 4 constituent campuses are in the stage of pre-visit completion.

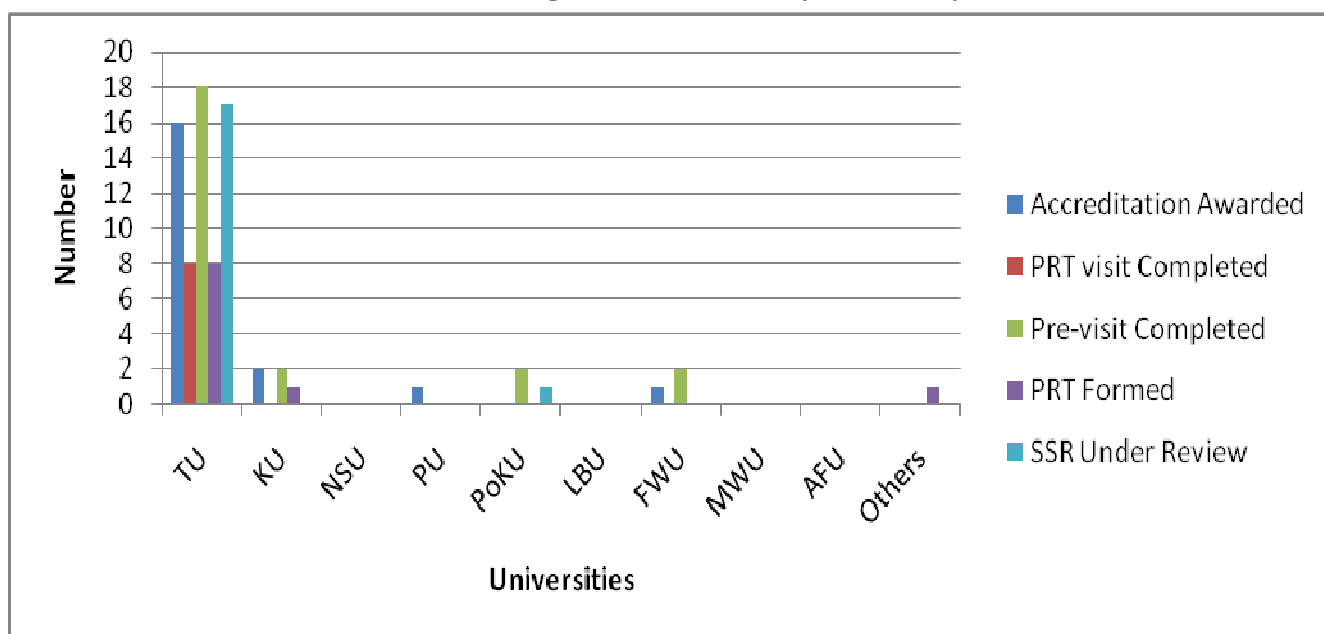

**Post SSR Stages of Institutions by Nature**

Tribhuvan University's institutions are largely dominant in terms of participation in the QAA process. The data shows that out of 21 accredited institutions, 18 are either constituent or community

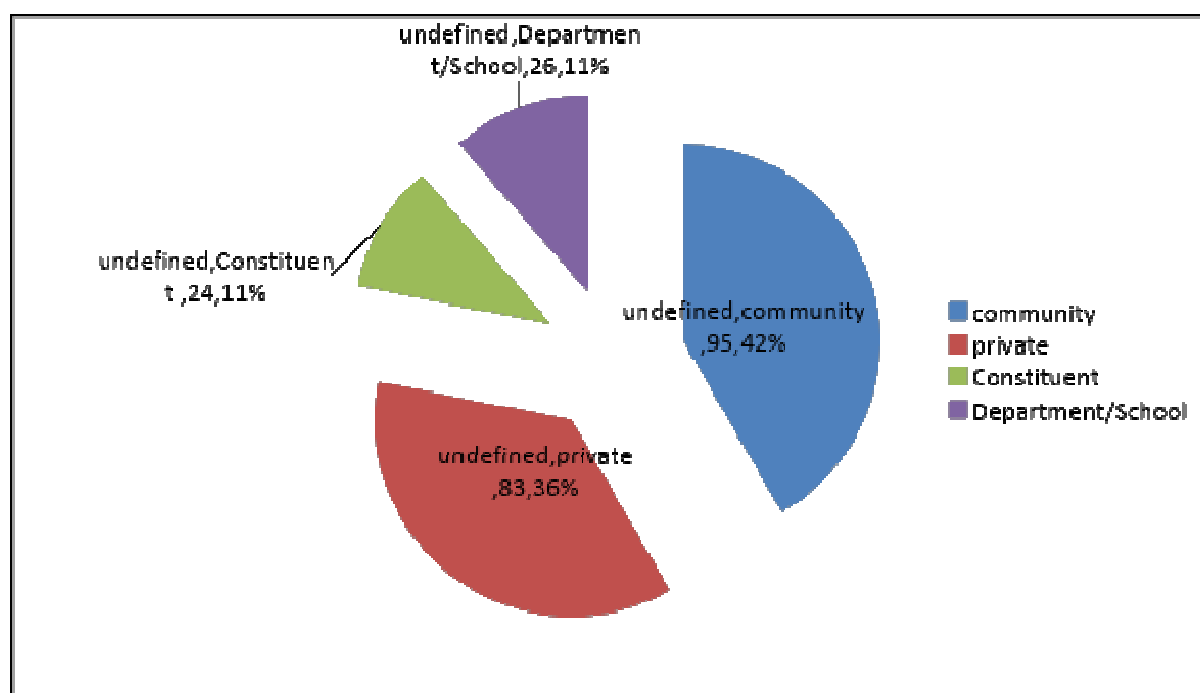

campuses of TU, whereas only 2 schools of KU and 1 affiliated campus of PU are accredited. Likewise, 8 institutions of TU have completed the QAA cycle, 18 institutions have completed pre-visit stage, PRT has been formed for 8 institutions and 17 other institutions of TU have submitted their SSR recently in QAAD for review. In contrast, 2 Schools of KU are accredited, 2 are in pre visit completion form and PRT has been formed for one school. Similarly, two schools of PoKU have passed the pre-visit stage and one has submitted SSR.

**Post SSR Stage of Institutions by University**

Since Balkumari College in Bharatpur, Chitwan was accredited in 2009 AD, the accreditation process has picked up the pace. The following table shows the year-wise accreditation granted to higher education institutions:

Year	Number of Institutions
2009-2012	5
2013	6
2015	3
2016	1
2017	1
2018	1

**Yearwise Accreditation Number****Share of LoI submitted by Institutions**

## Accreditation

In total, 21 institutions have been accredited. The number of accredited community campuses is high in comparison to other types of institutions. 17 community campuses have already been accredited, whereas only 2 schools of Kathmandu University, one constitute campus of Tribhuvan University (TU) and one private campus under Purvanchal University (PU) have received accreditation. All 17 accredited community campuses are affiliated to Tribhuvan University.

**Table 1. Nature of Accredited Institutions**

Status	Nature				
	Constituent	Department/School	Community	Private	Others
Accreditation Awarded	1	2	17	1	

### **Peer Review Team Assessment**

Thirteen Peer Review Team (PRT) assessment visits were conducted in various institutions in FY 2074/075. This also signals the completion a of cycle stage in the QAA process. Out of 13 assessments, 6 were done for the second cycle of accreditation and 7 for the first cycle. Once these institutions pass the follow up visits, the number of accredited institutions is expected to increase significantly.

### **Pre-Assessment**

Altogether, 24 institutions are in the pre-assessment completion stage. In FY 2074/075, pre-assessment visits were conducted in 17 campuses including 4 in the second cycle of accreditation. These institutions are currently undergoing a reform process based on the recommendations provided during the pre-assessment visit. Two campuses have already submitted a response report in QAAD and a PRT assessment visit will be conducted there soon. Most of the institutions on this list are expected to reach the target of accreditation in the upcoming FY.

### **Follow Up**

In FY 2074/075, PRT follow-up visits were carried out in four campuses to assess the progress made in the implementation of recommendations provided by the PRT.

### **Orientation / Workshops / Facilitation**

Quality Assurance and Accreditation Council is currently promoting a formative process in a QAA system by providing institutions technical support through orientations, workshops and other such facilities. Such activities were conducted in 11 institutions based on the need felt by the division itself and also as demanded by the institutions. Besides these specific QAAD approaches, orientations and workshops have been conducted through several other visiting teams from UGC. The monitoring visit plan and its execution that the Reform Unit of UGC designed has been impactful to campuses in QAA orientations.

Orientations and workshops are also conducted for peer reviewers.

## SECTION V

### IMPLEMENTATION PROGRESS REPORT

#### FISCAL YEAR 2074/75 (2017/18)

---

#### 5.1 Introduction

##### Background

The Government of Nepal has initiated Higher Education Reforms Project (HERP, 2015-2020) with the financial and technical assistance of the World Bank as a priority project to support implementation of the national Higher Education Policy (HEP) framework and the National Program for Higher Education Reform and Development (NPHERD). The policy and project both aim to address the issues and needs of higher education reform and development in the country in a comprehensive way, focusing on sectors of national priority, mainly the need for economic growth and development, expansion of employment opportunities, poverty-reduction, and the growth of a sustainable economy in the country. The national program consists of four major components: (i) *Higher Education Reforms* to bring a series of systemic, institutional and academic reforms for relevance, equity, and academic excellence in research and HEIs at large; (ii) *Centers of Excellence* to develop national hubs of academic excellence, research and innovation in areas of national priority; (iii) *System Strengthening* to enhance the governance and management capabilities of HEIs; and (iv) *Regular Program Enhancement* to improve effectiveness and efficiency of government funding.

The total budget of HERP is 65 Million USD. The implementation of the project began in May 2015 and is projected to complete by June 2020.

##### Project Components, Areas and DLIs

The HERP has two main components: (1) Implementation of Reforms and (2) Project Management and Capacity Development. It comprises four additional result areas: (i) Systemic/Institutional Reforms; (ii) Academic Reforms and Relevance; (iii) Equity; and (iv) Academic Excellence and Research.

The project has set seven targets areas under component one (1). The World Bank's soft loan credit support release is based on observed progress in terms of the following seven Disbursement Linked Indicators (DLIs).

DLI	Total DLI disbursement value, US\$
DLI 1. A national accreditation system established and functioning	9.00
DLI 2. Performance based financing, extended to higher education	16.875
DLI 3. Autonomy extended to additional campuses/schools	7.50
DLI 4. Examination reforms implemented and academic calendar enforced in TU	6.375
DLI 5. Academic reforms introduced	9.00
DLI 6. Poverty targeted financial support for disadvantaged students	4.50
DLI 7. Institutions supported for academic excellence in priority areas through research, development and innovation	6.750
Total DLI based allocations	60
Total expenditure for Project Management and Capacity Development	5.00
Total project cost	65.00

The project is being implemented on the basis of Project Implementation Manual (PIM). Regulations and guidelines are drafted as necessary while undertaking different project activities.

## 5.2 Implementation Arrangement

University Grants Commission (UGC) along with Tribhuvan University and Student Financial Assistance Fund Development Board (SFAFDB) are entrusted with the successful implementation of HERP. UGC is responsible for the overall project coordination and its progress. The following table lists the DLI-specific responsibilities of the three implementing agencies:

Implementing agency	Responsible for achieving DLI
UGC	DLI 1, 2, 3 (Part relating to universities other than TU), 5 and 7a (All except TU related part)
TU	The DLI 3 (All except relating to other universities), DLI 4 and DLI 7b (Relating to academic excellence based promotion)
SFAFDB	DLI 6

Project implementation is assisted by various committees and experts, such as project steering committee, joint coordination committee of UGC and TU, research council, QAA council, research evaluation committee, QAA Technical committee, research cluster committees, peer review teams, reform committee, and QAA experts.

### **University Grants Commission Components**

UGC parts of HERP implementation activities are being undertaken through Quality Assurance and Accreditation Division (QAAD), Research Division (RD), Monitoring Division (MD), Education Management Information System (EMIS) section, Reform Unit (RU), Procurement Section, Finance Division and Administration Division. The Reform Unit coordinates and compiles the information for preparing baseline and progress data. UGC also receives information and data from TU PIO as well as SFAFDB to prepare a comprehensive report.

### **Tribhuvan University Components**

TU has set up TUPIO with Finance Section, EMIS Section, Administrative Section, Procurement Section and Monitoring Section to implement HERP. It has also mobilized Office of the Controller of Examination (OCE), TU Finance Division, Central Departments, Autonomous and Decentralized campuses, as well as affiliated campuses. The TUPIO monitoring section, in coordination with EMIS, finance and other sections, maintains records relating to all TU components of HERP, including grant provision, progress, and monitoring. TUPIO coordinates and compiles information to prepare baseline and progress data from all these entities. TUPIO's report and the collected data are submitted to UGC to prepare a comprehensive baseline and progress report.

### **Student Financial Assistance Fund Development Board Components**

This component has the following objectives:

- i) establishing a pro-poor targeting method for scholarship distribution, and
- ii) ensuring that students from disadvantaged groups have an opportunity to obtain higher education through financial assistance provided by the project.

Provisions under student financial assistance consist of student scholarships for: a) higher secondary school students in science streams and b) Bachelor students through student loans for Bachelor students or support for work-study schemes.

SFAFDB has a Finance Section, EMIS Section, Administrative Section, Procurement Section and Monitoring Section to assist in implementing HERP. It has also mobilized the support of the Department of Education (DEO), Rastriya Banijya Bank (RBB), Higher Secondary Education Board (HSEB) and other stakeholders. SFAFDB coordinates and compiles information to prepare baseline data from all these entities. SFAFDB's report and data are submitted to UGC so that it can prepare a comprehensive baseline report.

### **Monitoring Provisions**

A comprehensive system of monitoring and feedback has been developed. Regular trimester progress reviews, donor review missions and midterm evaluations will be conducted to ensure implementation progress. An independent impact study will be conducted for final assessment.

The project monitoring will be based on the following:

- Project Development Objectives (PDOs)
- Key Project Indicators (KPIs)
- Intermediate Indicators
- Disbursement Linked Indicators
- Other activity based indicators

### **5.3 Highlights of Major Activities**

Major highlights of the project development activities this year include:

- The HERP mid-term review was conducted by WB review mission from 10-29 December 2017. A subsequent review and facilitation mission was conducted from 10-25 September 2018. The project implementation progress, strategies and provisions were reviewed and the needs for strengthening the implementation pointed out.
- Expert committees for addressing EMF and SMF were formed at TU and in UGC in 2018 to support environmental screening as well as enable HERP-participating institutions to undertake screening at an institutional level.
- HERP facilitation monitoring and visits were accomplished in 8 clusters, each cluster consisting of about 6 campuses participating in HERP in the fiscal year 2074/75.
- A seminar on QAA – Sharing experiences of QAA system Development in Nepal and Indian Experiences of Peer review-- was held in September 2018 (Paper presentation By Professor Thumulary).
- The government of Nepal endorsed the UGC Regulation on Quality Assurance and Accreditation (2073), granting the QAA system with a functionally autonomous QAA Council and QAA Division working as its secretariat. Subsequently, UGC approved QAA Directive in November 2017 (2074 Marga 27) and accordingly the QAA Council approved an amendment in QAA guidelines with revised QAA participation criteria. The QAA guidelines were revised in October 2018 (guideline 2075 Kartik 16).
- 2 expert consultants and 3 additional QAA assistants – Professor Chandra Lal Shrestha and Professor Basudev Kafle-- joined the QAA division as part time consultants for QAA in FY 2074/75. In addition, Ms. Sita Dumre, Ms. Nabina Chaulagain and Ms. Aashma Adhikari were recruited as Assistants for QAA Division.
- Orientation programs were run for campuses participating in QAA process in 3 clusters covering the eastern, central and western parts of the country in 2074/75. An Orientation program for potential peer reviewers was accomplished for 3 batches in 2074/75.
- A cumulative total of 21 campuses were accredited in FY 2074/75, including 4 newly accredited and 5 re-accredited campuses. Accreditation certificate award ceremonies were held at UGC for newly accredited campuses in 2 batches.

## 5.4 DLI Based Progress

### Brief Summary of HERP Implementation Progress

This is a brief report highlighting the implementation progress of the Higher Education Reform Project (HERP) by August 2018. The report follows seven Disbursement Linked Indicators (DLIs).

#### 1. DLI 1

The number of accredited institutions reached 21 including six institutions that had completed the first accreditation period and were re-accredited following the QAA process. The number fulfills the year 1 target of 20, but is below the year 3 cumulative target of 60 accredited institutions.

An additional 42 self-study reports are under the process of peer review; 8 have completed a QAA cycle; and 24 institutions have completed Peer Review Pre-visit stage (the stage before the final field based study). PRTs were formed for an additional 10 institutions. 4 institutions are in the process of forming peer review teams under the supervision of UGC. 15 institutions have submitted SSRs and are revising based on the feedback provided by QAAD. In total, 306 institutions have submitted LOI for QAA participation.

UGC is in the process of strengthening the QAA system – it has hired two expert consultants to support the system, assigned an accountant and a monitoring officer; recruited an additional 3 program assistants, prepared a schedule taking into consideration the implementation targets to be met. The system, in accordance with the QAA regulation endorsed (on May 8, 2017) by the government of Nepal, is functionally autonomous. A QAA Directive has been prepared and approved by the UGC. The directive has provisions for accreditation at 2 stages – provisional (for those which achieved 50% or above in aggregate but failed to remained short of achieving 50% in all criteria) and full accreditation (achieving 50% or above in each of the criteria).

#### 2. DLI 2

Regarding the 1<sup>st</sup> part of DLI 2, selection of the third cohort which is also final cohort has been accomplished cumulating to a total of 164 Higher Education Institutions (151 campuses and 13 Central Departments (124 Community Campuses + 20 TU Constituent Campuses + 7 TU Autonomous Campuses+13 TU Central Departments) HEIs selected for participating in the project for this DLI against the total project period target of 135 campuses. Grants are provided to 124 of the selected campuses with additional 17(37.78% of the year 3 target) from among the selected campuses receiving the performance grants. Additionally, 13 Central Departments of TU have also been selected for participation in the project.

Regarding the second part of DLI 2, formula based block grants have been provided to 3 autonomous campuses achieving 100% of year 1 target (2) and 50% of year 2 target (2). Performance based funding was provided to 471 community campuses in years 1 and 2 against the target of 30 for both years.

The institutions are being desk monitored as well through field visits. To visit 124 community campuses, 18 clusters have been formed. 8 clusters have been visited so far . (Nawalparasi; Rupandehi; Jhapa-Taplejung; Kathmandu valley; Kaski; Syangja-Palpla; Morang-Sunsari; Kailali-Achham).

### 3. DLI 3

The 1<sup>st</sup> part of this DLI relates to a number of TU constituent campuses getting institutional autonomy and moving to the provision of earmarked block grants. 3 constituent campuses have become autonomous and have received formula based earmarked block grants. Cumulatively, TU has now provided autonomy to 7 campuses against the year 3 target of 11.

The second part of this DLI is linked to granting academic autonomy to constituent and community campuses (accredited constituent or community campuses, or autonomous TU constituent campuses). Two campuses, Lumbini Banijya Campus and Janapriya Multiple Campus, have attained full academic autonomy for new academic programs, including the authority to conduct examinations. Kailali Multiple Campus has attained the authority to develop and run its own programs.

### 4. DLI 4

The part one target under DLI 4 for year 3 is to ensure that the academic calendar of the 9 centralized Master programs are adhered to. In the second year of project implementation, 17 centralized Master programs adhered to their academic calendar.. This achievement surpassed the total project target of 15 (3 each year for 5 years).

The part two target of DLI 4 is to ensure the results of regular centralized Bachelor's programs<sup>1</sup> are published within five months of exam dates on an average (Humanities & Social Sciences; Education; Management). Results for regular centralized Bachelor's programs<sup>2</sup> were published within 5 months and 13 days on an average in the 1<sup>st</sup> year and 2nd year. The same publication time is expected in the third year.

### 5. DLI 5

The target for this DLI is to ensure an additional 60 programs are revised or introduced<sup>3</sup>, (cumulative 140). By the second trimester period, a total of 56 new programs have been introduced or revised (26 introduced and 30 revised). Applications have been collected for support from various campuses and universities, so far, applications from about 30 new programs introduced or revised they will be developed.

Issues: Launching a new program causes many concerns – infrastructure, resources, identifying prospective students and managing faculty. Therefore, the capacity of universities to launch new

3 50 to 60% of the target is for revision of existing programs, which can be in any area/discipline, and remaining 40 to 50% of the target is for introduction of new programs that have to be in identified priority areas.

program and to revise the existing programs should be enhanced so that they are able to maintain protocols, systematic recording and referral/retrieval, supervision, monitoring, and manage resources.

## 6. DLI 6

The target for DLI 6 for the third cohort is to have at least 3,000<sup>4</sup> students selected through PMT and funds provided to at least 6000 students as per schedule. By this reporting period, a total of 8109 (1319 secondary level 6790 bachelor level) students have been selected and 5532 have been provided funds. The selection and funding goals for year 1 and 2 were met and the target for year 3 is expected to be met. Selection of the third cohort and the process of providing scholarship funds to them is ongoing.

Issue: The main issue with the SFAFDB program is its sustainability. This year, a budgeting decision regarding the scholarship provision commitments to launch the selection of Bachelor level new batch for scholarship needs to be made. The Bachelor level scholarship commitments need to cover a 4 year program which goes beyond the project period of 2015-2020. The whole SFAFDB program is being run with staff salary funded by the project. Measures to ensure the system and office continue after the project need to be taken soon.

## 7. DLI 7

Under the UGC sub-component 7(a), the third year targets for DLI 7 include (i) Selection of a third batch of projects (at least additional 150; a total of 400 selected projects) and (ii) funds provided to the three batches as per schedule.

Under the UGC sub-component 7(a), the first batch (year 1 batch) of 295 research projects was selected in year 1 and all were successfully funded. In year 2, the second batch of 350 projects have already been selected and 327 of them have been funded. Cumulatively the number of total projects (which is 622) selected and funded has surpassed the cumulative total project period target of 500. Research support provisions have become a regular, ongoing feature of UGC. The Research Division is completing the remaining selection process and is also planning to publicly announce new support schemes.

DLI7(b) targets the recruitment and promotion of the third batch of faculty (at least additional ten, cumulative total 30). So far, 12 faculty members have been recruited on the basis of academic excellence. Additional selections are in process.

Issue: Strengthening the system and ensuring that the new recruitments bring expected outcomes.

### **The DLI Achievement and Eligible Expenditure Programs Claim Status**

The total pricing of DLI achieved in the 5<sup>th</sup> DLI claim reporting period corresponding to the claim in 2074/75 is SDR 5,735,797.20 which is the sum of eligible claims of SDR 517,500 for DLI 1

---

4 79% of the target is for students at Bachelors Level (HE) and remaining 21% of the target is for students at Higher Secondary Level altogether.

(i); 390,236.89 for DLI 2 (part 1); 1,552,666.66 for DLI2 (2<sup>nd</sup> part); 517,500 for DLI 3 (2<sup>nd</sup> part); 551999.99 for DLI 5; 654,327.00 for DLI6; and 1,515,666.66 for DLI 7(a).

By this reporting period of year three first claim (overall 5<sup>th</sup> claim report), the total salary expenditure of TU which is verified and reported for the period until November 16, 2017 (Kartik 30, 2074) i.e., the Eligible expenditure Programs by the year was NPR 5,229,942,098.05. The EEP under scholarship until March 14, 2018 (2074 Falgun 30) was NPR 272,019,000.00 and the EEP under the research grants until July 15, 2017 (Ashadh, 31 2074) was NPR 36,555,489.10. The total EEP reporting for this period is NPR 5,538,516,587.15. The EEP claim amount (20% of EEP) is NPR 1,107,703,317.43 which is approximately SDR 7,171,885.18 (1 SDR = NPR 154.54). Moreover the EEP claim brought forward from the last claim period (Year 2, 2<sup>nd</sup> claim) is SDR 2,874,148.52. Therefore the total EEP claim for the third year first claim period (5<sup>th</sup> report) is SDR 10,046,033.70 approximately.

UGC requested the World Bank to disburse SDR 5,735,797.20 to GoN treasury against the DLI earned amount as per the financing agreement. The remainder of the EEP claim of SDR 4310236.50 has been carried over to the next reporting period.

Total disbursement received from the World Bank as of August 31, 2018 is SDR 22.86 million (equivalent US\$ 32.12 million) which is 50% of the total HERP budget. Additional US\$ 12.0 million is expected to be disbursed by May-June 2019.

The Table below lists the targets, progress and the achievements made in the year two of HERP implementation.

### Achievements of targets for DLI 1-7 in FY 2017/18

## 5.5 Issues, Challenges and Way Forward

### Issues and Challenges

Though the implementation of HERP has faced challenges and hurdles, it has brought many reforms in higher education.. The political milieu of Nepal remains a major challenge as it affects political appointments and thereby creates a dearth of stable and confident institutional leaderships in higher education. This situation has implications even for the UGC. The position of UGC Chairman, which is also supposed to lead reform and development programs as the Chairman of the QAA Council, Research Council, and Student Financial Assistance and Fund Development Board, has remained vacant since June 18, 2018. The issue of appointment has recurred upon each term completion of the incumbent Chairperson or the Member Secretary of the UGC. There is a need for concerned authorities to be serious on the credibility of the systems. If it is a seriously difficult to resolve, the government should at least make provisions for an alternative temporary arrangement immediately.

Most of the other institutional development and reform challenges relate to shifting the higher education approaches from the existing contexts, values, and practices to new directions set by the project following the higher education policy and the national program outline. For example, a significant number of higher education institutions (306) have participated in the Quality Assurance and Accreditation System. However, getting accredited remained a tough endeavor for most of the institutions (only 21 are accredited so far). Consequently, the envisaged DLI 1 target remained unachieved. With the government endorsement of the UGC regulation for Quality Assurance and Accreditation, the system is now undergoing transformation, and gaining functional autonomy. The main hurdle before achieving functional autonomy is the acquisition of adequate capacities including adequate staff and appropriate set up.

Universities and their constituent as well as affiliated institutions still need to transform their EMIS for effective, comprehensive and timely data reporting. Although DLI 2 targets are met, the coverage of performance indicators remained limited because of a lack of timely data updates.

The attainment of institutional autonomy by constituent campuses and academic autonomy by constituent as well as affiliated campuses (the DLI 3 target achievement) has remained rather challenging. Sustaining achieved autonomy also remains a challenge to the campuses that have become autonomous. The challenge stems from the diverse motives of stakeholders regarding autonomy, the limited resources for assuring that the institutions can contain different aspirations, and most importantly the inhibitions on the part of all concerned in taking the challenge of the flight to new realm of freedom and responsibility. Meaningful autonomy cannot be achieved without an appropriate level of trust, a suitable environment, and the cooperation of all concerned parties.

Target achievements related to DLI 4 in year one and also in year two are encouraging. However,, the concern is whether the system can sustain capacity development in the long run or is more suited to a targeted short term mission. The stalled progress in terms of the second part of DLI3 brings this question to the fore.

Achieving DLI 5 targets remains rather challenging. Most of the institutions making efforts to introduce new programs/ revise existing programs face difficulties in mobilizing initial resources as HERP funding support is provided only on the basis of performance outcome after the enrolment of students. Introducing new programs or revising existing programs requires intensive preparatory work including protocols of developing and approving programs, orientation for the teachers, information dissemination to prospective students, appropriate arrangement of classes, labs, and equipment etc. Many higher education institutions that introduced new programs or revised existing programs found it difficult to follow systemic protocols and keep documentations intact. Completing basic eligibility requirements for funding (submitting the proposal in appropriate format, structuring courses and curriculums, receiving evidence of approval from the academic council, keeping track of student enrolment and progress up to examination, participating in QAA and EMIS processes, and submitting a financial audit report) remained challenging for the institutions. Moving from annual to semester systems is also a big challenge given the conditions required for the semester system including the class size, rigor of student teacher interaction, student assessments and terminal examinations, teacher preparation, and curricular activities. This difficulty is particularly felt by TU-affiliated institutions.. There is, therefore, a need to reflect on the requirements and support system provisions to ensure timely and adequate support for institutions seeking to introduce or revise academic programs.

DLI 6 targets are now met for both year 1 and 2, and SFAFDB is poised to achieve the year 3 target. The system of SFAFDB has proven functionally viable and is now struggling to gain stability. The system had remained without a Director for a long period, during which staff had struggled to remain engaged and achieve project targets. The system, now with a new Director, is taking up the challenge of improving effectiveness and sustainability. However, sustaining the system after the project period remains a challenge.

The achievements regarding DLI 7a have already covered the targets of the entire project period (up to 2020), even surpassing the targets of supporting 500 projects by additional 22 (total 522) by this (5<sup>th</sup> report) period. The research funding activities will continue further expanding the support to more number of research and related activity projects as per schedule in the UGC research guidelines. DLI 7b target remains of recruitment/promotion of faculty members in TU strictly on the basis of academic excellence/merit are yet to be met. So far 2 faculty members have been appointed following the guidelines adopted by TU, more appointments are on the process. The challenges in meeting the targets mainly relate to ensuring inter and intra systemic operation in setting and following a scheduled calendar.

The challenges of achieving the HERP targets by the agreed DLIs mainly relate partly to the system capacity, partly to availability of resource and mobilization modality, and most importantly to the prevailing political milieu in the country that continues to influence higher education reform initiatives.

The damages brought by the devastating Earthquakes of April 25(magnitude 7.8) and May 12 (magnitude 6.9) still continue to pose major challenges. Many of the physical infrastructures of HEIs

including the totally collapsed 40 buildings and more than 100 severely damaged as well as many libraries and laboratory related materials and equipment remains to be restored at least to a proper level. There is immense pressure on HERP for addressing the issue.

Overall, there is demand and also a need to review HERP provisions and modalities to address the changed contexts in terms of the need to respond emergency conditions, rehabilitation and reconstructions priorities.

Regarding the fund provision, fund flow and follow-up, it has been felt as structured rather strictly to the DLI frame, which is output based. There is growing concerns that the output may be superficially driven by the support provision rather than sorting out the root causes and dealing the underlying issues. There is a need for facilitating meaningful participation of the HEIs in HERP provisions, modality and process. Enhancements of the levels of motivation and capacities of the participating institutions as well as the implementing bodies are important aspects of reform initiatives.

There has been demand by the stakeholders regarding review of the financial support of the World Bank in the form of loan instead of grants. At the early preparation phase of HERP it was assumed that the support will be in the form of grants funding which however changed to soft loan on the basis of apparent country capacity of loan payback. The condition is however far removed from the apparent capacity. Although the issue provided opportunity to develop stringent measures of fund utilization, the disbursement of fund flow remained more challenging.

Two basic issues have remained persistent challenges for the higher education reform initiatives in the country: low pass out rates in higher education, particularly in TU system; and low enrolment rate in the areas of science and technology. UGC is taking steps to critically examine the underlying issues relating to efficiency of higher education through thematic study on student performance and examinations. It is also exploring the prospects and scopes of expanding science and technology education in the country. UGC is also undertaking a beneficiary satisfaction survey in view of understanding the stakeholders' concerns and expectations regarding higher education and reform initiatives.

## **Way Forward**

The mid-term review of HERP was conducted this fiscal year (December 11-29, 2017). Both implementing bodies and the beneficiary institutions have reviewed the project implementation and critically reflected on the implementation issues that included slow progress in terms of quality assurance and accreditation (DLI1), institutional autonomy of TU constituent campuses as well as academic autonomy of accredited constituent/affiliated campuses (DLI3), examination system improvement (DLI 4), new programs and program revisions relevant to national priorities (DLI5) and academic merit based recruitment/promotion in TU (DLI7b). The issues are critically reflected in the concerns and expectations of all stakeholders. The preliminary understanding indicated that there is a need to make the project more versatile and flexible in addressing the issues and challenges of higher education reform. The targets and funding allocations need to be revised and the project

implementation guidelines need to be revisited.. Future implementations need to take the agreed actions and suggestions listed in the aide memoire into account.

Overall, there are great expectations from HERP. The expectations include the urgency of addressing the post-earthquake disaster in the country. The milieu of political transition remains ever crucial with explicit impacts on decisions as well as on institutional reform initiatives. These issues however need to be addressed with empathy, sensitivity and most importantly with critical reflection.

A beneficiary satisfaction survey initiated by UGC has shown that the beneficiaries and stakeholders of HERP feel that the project has brought positive results and implications on the reform and development of higher education. The reform and development efforts should therefore be continued and sustained. There are however need for strengthening the systems established by the project, making them more effective and efficient.

### **In Brief**

HERP set out with four major goals:

1. System capacity development – QAA, EMIS, Autonomy, strengthening the TU examination system, and performance based funding;
2. Academic reform for quality and relevance – Introduction of new, or revision of existing academic programs, academic autonomy;
3. Inclusion and equity in access to higher education – scholarships targeted towards students living in poverty and student support services, including guidance and counselling;
4. Academic excellence and research – Research support programs.

The implementation of HERP has brought many changes in the areas. While achievements in terms of some DLI indicators has remained satisfactory,s, achievements regarding other indicators has remained lackluster. Particularly, DLI 1 and DLI 3 are considered crucial indicators, DLI 6 is new strategy addressing the issue of equity, DLI 5 focuses on result area 2, DLI 7 addresses the academic excellence through research support. DLI 2 and DLI 4 are strategic provisions that support DLI1, DLI3 and DLI5. The results obtained from implementing the project indicate a need to:

1. Expedite autonomous national QAA system
2. Bring clarity and commitment in implementing higher education policies, particularly autonomy in higher education
3. Expand access to science and technical education
4. Sustain the systems, mechanisms and human resources developed with the support of the project (e.g., QAA, Research, SFAFDB, EMIS, Reform through performance based monitoring) by adopting a regular national higher education system with a structured, regular budget, program and staffing

## SECTION VI

### PRESENT CONDITION OF HIGHER EDUCATION, PROBLEMS AND CHALLENGES AND AREAS OF IMPROVEMENT

---

#### 6.1 Present Condition of Higher Education

- As per the multi-universities policy adopted by the Government of Nepal, altogether, eleven universities (Tribhuvan University, Kathmandu University, Purbanchal University, Nepal Sanskrit University, Lumbini Buddhist University, Agriculture and Forestry University, Far Western University, Mid Western University, and Pokhara University, Nepal Open University, Rajarshi Janak University) and four deemed universities (B. P. Koirala Institute of Health Sciences, National Academy of Health Sciences, Patan Academy of Health Sciences, and Karnali Academy of Health Sciences) are currently in operation. The Government of Nepal has recently established Rajarshi Janak University but the office bearers of this university have yet to be appointed. Nepal Open University, established last year, is preparing to formally launch educational programs this fiscal year.
- In the previous fiscal year, among the 371184 students pursuing higher education in Nepal, the majority were enrolled in TU and the least number of students were enrolled in Lumbini Buddhist University. TU alone accounted for 289566 students enrolled; whereas Kathmandu University, Purbanchal University, Nepal Sanskrit University, Pokhara University, Lumbini Buddhist University, Agriculture and Forestry University, Far Western University, Mid-western University, B. P. Koirala Institute of Health Sciences, National Academy of Health Sciences, and Patan Academy of Health Sciences accounted for 17080, 27265, 1301, 26895, 236, 1723, 2099, 2778, 1448, 544 and 249 students, respectively.
- With the increase in number of college campuses, the number of university constituent campuses has reached 99. 532 community and 777 private colleges are affiliated to universities.
- About 81.68% of higher educational institutions offer programs up to the Bachelor level and only 18.32% offer Master level programs. Due to the inability to regulate the university affiliation process through mapping, currently, the highest number (43.5%) of higher educational institutions is located in Province 3, whereas the least (3.98%) is located in Province 6.

- 38.87% of students are enrolled in private colleges, 28.46% in community colleges and 32.66% in constituent campuses. In comparison to previous years, student enrollment in community and private colleges has increased. However, there is a significant inequality in the distribution of student populations among community colleges.
- In terms of disciplines, the highest number of students is enrolled in the Management stream and the least number of students is enrolled in the Ayurvedic stream. Management, Education, and Humanities streams account for 39.86%, 22.53% and 13.24% of total student enrollment respectively. Similarly, 8.52%, 6.94% and 7.55% of students are enrolled in Science and Technology, Medicine, and Engineering areas respectively. The other areas—Sanskrit, Agriculture and Forestry, Ayurveda, Buddhism, and Law—account for 1.36% of total student enrollment.
- There has been an encouraging growth in the participation of female students in higher education. The net enrollment of female students has reached 55%. Presently, the Gender Parity Index stands at 1.11.
- The number of institutions receiving Letter of Intent (LOI) for Quality Assurance and Accreditation (QAA) from higher educational institutions has increased. Since the fiscal year 2066/67, 26 higher educational institutions have obtained Quality Assurance and Accreditation certification.
- The number of teachers teaching in constituent campuses has increased to 9154. Among them, 840 are professors, 2193 associate professors, 5116 lecturers, 750 teaching assistants, and 255 are instructors. Including community and private colleges, approximately 20000 full-time and part-time teachers are working in higher education. In comparison to previous years, the number of professors and associate professor has dramatically increased. This is likely to develop a reverse pyramid supply situation in the organizational level of universities.
- During the fiscal year 2074/75, the government of Nepal has allocated a total of Rs. 10,12,17,70000.00, of which Rs. 9,89,59,37000.00 has been expended.
- In the current fiscal year (2074/75), a total of Rs. 13,24,77,00,000.00 will be received from the government of Nepal; whereas the provisions for the budget of the Open University have been made in the budget of the Ministry of Education. It is also expected to receive additional grants for new universities to be opened and on other heads.
- In the previous fiscal year (2074/75), a total of Rs. 99,74,00,000.00 was received under the soft loan assistance of the World Bank; of which Rs. 95,55,30,000.00 has been expended. In the current fiscal year (2074/75), a grant of Rs. 1,41,47,00,000.00 is expected to be received.

- In the previous fiscal year, higher educational institutions damaged by the earthquake of 2072 Baishakh 12 received grants totalling Rs. 32,50,00,000.00. In the current fiscal year (2074/75), a grant of Rs. 50,00,00,000.00 is expected for the reconstruction and rehabilitation project.
- According to a report published by UNESCO, in 2010, the percentage of the population earning less than \$1.25 per day dropped to 22% in developing countries from 47% in 1990. This shows that more than 100 million people are still living in extreme poverty. In African and Sub-Sahara countries, an attainment of one additional higher level of education on average has contributed to 10% of economic growth. Therefore, Nepal needs to increase the investment in higher education as it plays a significant role in the reduction of poverty. Currently, the investment made by the government of Nepal in education stands at 3.4% of the Gross Domestic Production (GDP), while the investment in higher education is less than 0.03% of the GDP. The aggregate investment in the entire education sector is thus 12% of the national budget; of the total investment in education, only 8% has been allocated to higher education. Therefore, in order to achieve the national goal of transforming Nepal into a developing country from the status of the least developed country by 2022, it is necessary to gradually increase the investment in education in the tune of 6% of the GDP and 12% of the national budget; of the total investment in education, 12% should be allocated to higher education.

## 6.2 Problems and Challenges

- Compared to the 30% average in developing countries, the net student enrollment rate in Nepal is 14%. However, the net enrollment rate has decreased by 1% since the previous year. Increasing the student enrollment rate in Nepal remains a challenge..
- In 345 higher education institutions, the number of students participating in examinations is less than 50; in a situation where 527 higher education institutions enroll between 51 to 200 students, the sustainable institutional development and management improvement have not been carried out mainly due to the continued tendency of unplanned establishment of colleges, lack of a set standard for affiliations and the absence of educational mapping.
- The passing rate of students in higher education remains at 32%. The passing rate in the general education stream is 25%, 37% in technical areas and 62% at the Master's level. Therefore, it is challenging to improve the quality of higher education and make it employment-oriented, especially given that almost 70% of investment is wasted.
- Although the number of higher education institutions and student enrollment has been increasing, the number of students leaving the country in search of quality education has also increased due to the lack of quality in education and opportunities to study technical subjects. This has led to an increased outflow of capital to foreign countries.

- The student enrollment in technical areas in Nepal stands at 23.9% as compared to the 30% average in developing countries; therefore, it is challenging to increase student enrollment in technical subjects and areas of national importance. The 4.9% increase in the number of students enrolling in technical subjects this academic year is a step towards a positive direction.
- The number of students participating in convocation programs has remained 90,922. If this number is taken as the basis of measurement, there is only a 24.50% return of the investment made in higher education. In the previous academic year, the production remained at 22% only. However, if the number of students who did not participate in convocations is added, this number is likely to increase. In terms of subject areas, education stream has the highest rate of graduation.
- The Great Earthquake of Baishakh 12, 2072 and the subsequent aftershocks had caused immense loss in higher education institutions. Although the government has prioritized the reconstruction of damaged infrastructures, the reconstruction work has not gained momentum. Therefore, immediate reconstruction of the damaged facilities needs to be carried out as it has affected teaching/learning and other educational services.
- Due to the inability to adhere to the academic calendar for the enrollment, operation, examination, and publication of results, parents and the nation at large have been bearing the loss of their investments.

### **6.3 Areas of Improvement**

- To implement the working policies outlined by the Higher Education Policy, 2072;
- To prepare an integrated framework for the establishment higher educational institutions, determine their areas of operation, management, and investment under the federal structure through extensive discussion and deliberation;
- To bring out clear policies and procedures and uniform management for the establishment of new universities; to expand the working area and develop specialization in academic programs of established universities;
- To end the practice of opening colleges without a plan; to enforce the criteria set for obtaining affiliations; and to prioritize the areas of national importance;
- To emphasize technical subjects of national importance in the context of established colleges offering traditional programs/ subjects following a unified curriculum and textbooks; to make higher education employment-oriented to avoid the general perception of higher education as a “factory producing unemployed”;
- To involve students and teachers in research activities by developing a research culture in higher education;

- To make the hiring process scientific and transparent by developing and implementing a basic eligibility test system for teachers aspiring to teach in higher education;
- To do the homework necessary for the effective operation of educational programs and the development of infrastructures and financial liability of newly established universities;
- To search for the special political consensus to minimize the adverse effects of political ambition and interference in the teaching/ learning environment in higher education;
- To develop and effectively implement a result-based evaluation and monitoring system to institutionalize accountability, educational growth, and the benefits of investment in higher education;
- To formulate and implement an effective policy to increase the access of higher education to women, poor, *dalits*, and underprivileged groups;
- To adopt an integrated scholarship program to systematize and expand the scholarships received from higher educational institutions and bodies, including the government of Nepal;
- To reform the management procedure so as to make the Quality Assurance and Accreditation (QAA) program more effective;
- To make necessary arrangements to attract students towards campuses located within their province and involve them in income-generating programs, especially considering the implementation of federalism in the country;
- To formulate and implement policies to bring uniformity in the management of teachers working in community campuses.
